The way you store your wine is important

The way you store and serve wine is important. Wine is a complex product that requires gentle treatment. Wine can mature too quickly, too slowly or just incorrectly, which may mean that it never quite reaches its highpoint. Similarly, if

the wine's serving temperature is not allowed to build up slowly, it can impact its taste. Too rapid warming or cooling can destroy the wine's aroma. Our wine coolers are designed for those who wish to give their wine the storage it deserves.

HOW TO STORE WINE

Wine is a living and sensitive product which demands gentle storage to safeguard the best conditions for its maturation and development.

Temperature

The ideal storage temperature for wine is about 10-14°C - which should be constant.

Air humidity

A humidity level of between 50-75% is essential to maintain the cork's sealing effect, and thereby its efficiency at keeping air out of the bottle.

Darkness

The bottle offers no protection against direct sunlight, and ultraviolet light in particular can be harmful to wine. Accordingly, wine should be stored in darkness - safely protected against UV radiation.

Vibration

If wine is exposed to repeated vibration, it will disrupt the wine's biochemical development.

biochemical development.

Vibrations are often the reason why some of the best and finest wines fail to reach their optimal taste.

Ventilation

Ventilation and the continuous circulation of air are fundamentally important to avoid the development of unpleasant odours, as well as mould.

Recommended serving temperatures for different wines

18 - 19°C Heavy, full-bodied and mature red wines such as Rhônes, Bordeaux Grand Cru Classés, Barolos, Rioja Gran Reservas	16 - 17°C Young, promising red wines such as Burgundies, St. Emillions, Pomerols, Chiantis, Barbarescos	14 - 15°C Light, young red wines such as Beaujolais, ordinary Pinot Noirs	12 - 13°C Full-bodied white wines (Chardonnays, Burgundies), Vintage Champagnes and the best Dessert Wines (Sauternes, Eisweins)	10 - 11°C Heavy white and sparkling wines (Champagnes)	8 - 9°C Light white and sparkling wines

Wine Coolers – perfect storage for your vintage wines

Wines develop their full flavour when they are at the right temperature for drinking. Our international quality wine coolers guarantee the perfect conditions for professional storage of red, white and sparkling wines. A wide range facilitates exactly the right model for every need.

Digital Temperature Indicator in W 185 and digital temperature setting in W-43, 72 and 120 models.

Height adjustable wooden shelves prevent vibration of wine during cabinet operation leaving the wine to mature in peace. Available in all models.

Attractive LED light and a tilted top shelf now available with W-185.

A charcoal filter cleanses the air, preventing bad odours from penetrating through the cork and affecting the wine. (Available in W 185)

Leading brands like ITC, Taj Group, Crowne Plaza, Fortune Hotels, Park Plaza, Ramada, Holiday Inn, ITDC, GRT Hotels are just some of the names in our growing list of satisfied customers.

Other features :

- Distinct temperature zones for different wines
- Tinted glass
- Height adjustable wooden shelves
- Interior light
- Electronic control of temperature
- Elegant black cabinet and inner shell

Reliable Beer Coolers

Features

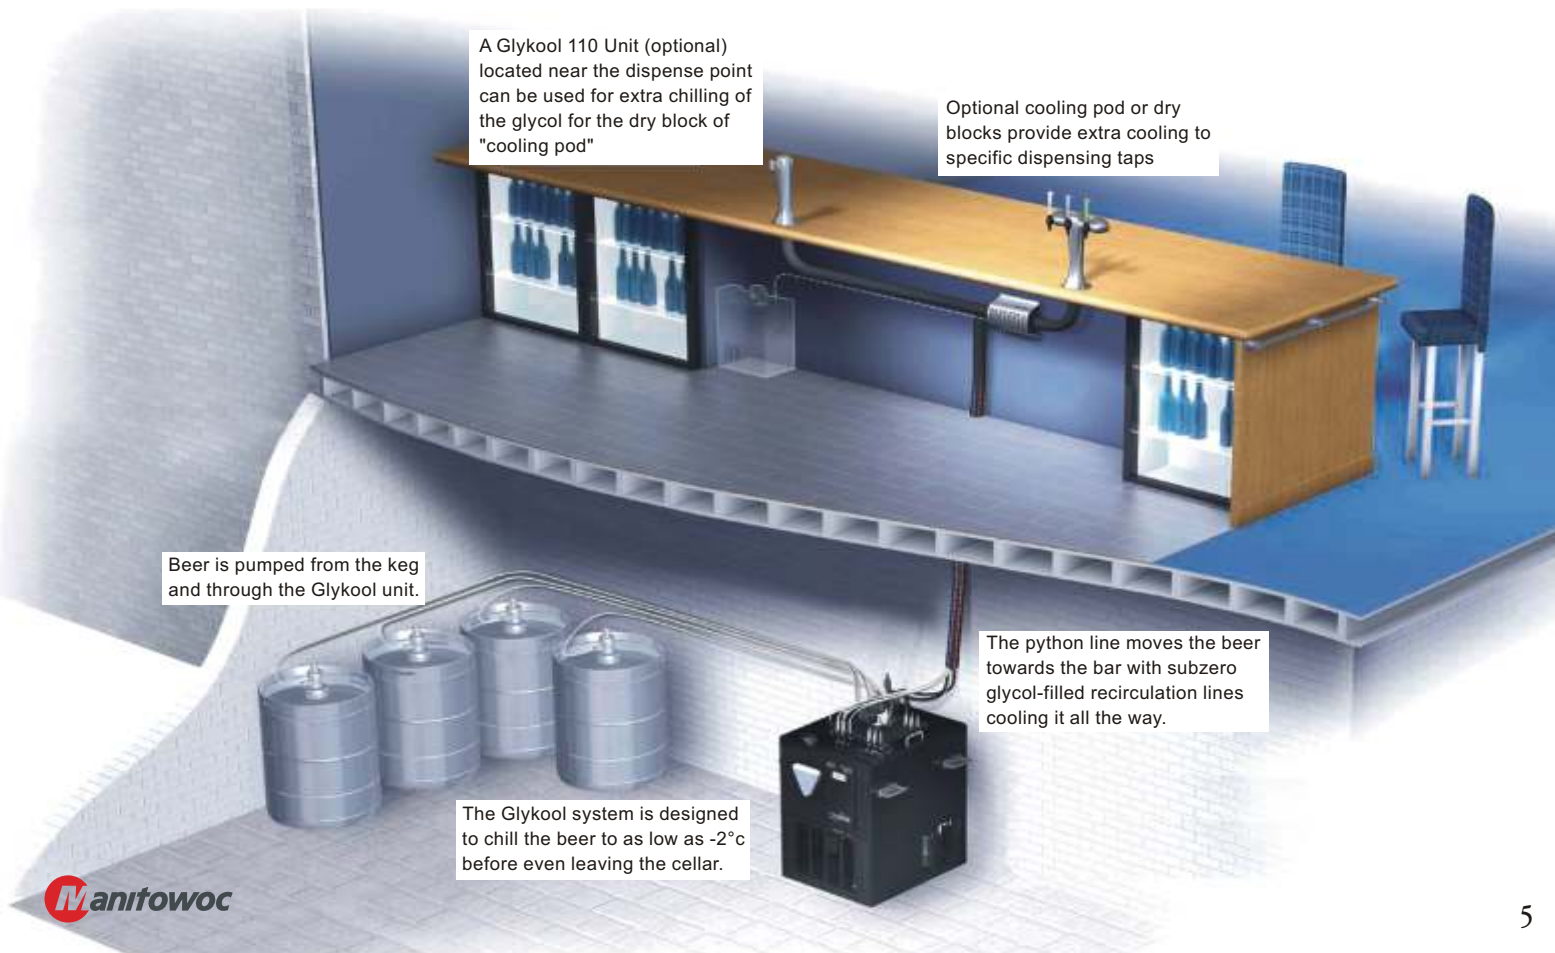

- 1 High performance instant beer cooling technology
- 2 Electronic ice-bank control
- 3 Integrated air-cooled system
- 4 Solid build, hi- quality construction, standardized platform design
- 5 Features "Max Ice Inside" that brings dramatic efficiency levels upto 60% more than ordinary coolers
- 6 Inbuilt recirculation pump to maintain beer temperature upto dispensing points
- 7 316-Grade Stainless Steel Beer Cooling Coils

Technical Specifications - Beer Coolers

Models	Dimensions W x D x H (mm)	Compressor Capacity (cc)	Refrigerant	Ice Bank Size (Kgs. / lb)	Dry Weight (Kgs.)	Flavor Cooling Coil Lengths (Mtrs.)	Flavor Options	Insulation

Post-mix Counter-top Beverage Dispensers

CEV-30

Available in 5, 6 & 8 valve options, Servend's Post-mix Counter-top Beverage Dispensers are designed for quick & easy installation and offer maximum beverage cooling and customer satisfaction.

Features :

- Enhanced design aesthetics with modular assembly
- Angled wrap-around illuminated merchandiser
- Easy to service, with quick access to air filter for cleaning and side by side placement of split carbonation and refrigeration decks. Easy slide on / off drain pan
- Flex manifold adds carb / non-carb flexibility
- New technology includes plug and play consolidated circuit board with protection for pump and compressor
- 360° graphics enhance aesthetics and increase promotion of fountain beverages

*CEV-40 (with 8 valves) also available.

Flomatic Valves from

Models available: 464 & 424

Push Button

Switch location ensures reliability. Large activation area. Durable, feather touch activation.

Portion Control

Four timed, programmable cup sizes. Programmable top-off feature. Rugged, wear-resistant switch.

Automatic Fill Lever

Precise shut-off and top-off activation. Requires no adjustment at installation. Circuitry protected in switch housing.

Sanitary Push Lever

NSF-listed lever design meets sanitation requirements. Eliminates contact with lip of cup for added sanitation. Flexible lever for maximum durability.

*Other accessories also available on request.

Please ask for our separate catalogue for Ice Machines, Bar Blenders and Glasswashers.
