

Convert,
ordinary tap water...

...into pure & chilled
drinking water

Celfrost brings Waterlogic to India - a revolutionary product that has made waves in USA, Italy, France, UK, Norway, Denmark, Australia, Ireland and many other countries. The product completely purifies ordinary tap water through a 6 level purification process that includes 'Reverse Osmosis' followed by 'UV' technology. The purified water can be dispensed hot, cold or at room temperature. It conforms to international quality standards on water safety and two of its models have now been specially developed for the Indian market.

The purest water cooler ever !

Waterlogic International is a leading name in Europe and 40 countries across the world in online water coolers with purification. In partnership with Celfrost, it presents two models developed after an extensive research specially for the Indian market :

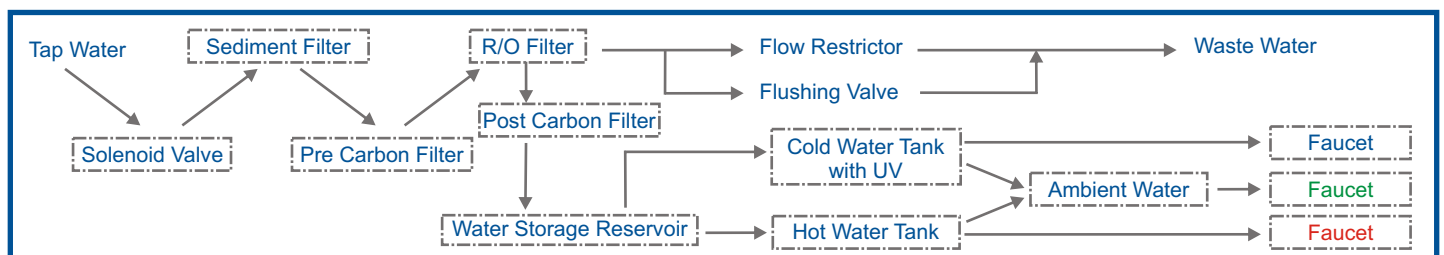

- WL 1000 RO+UV equipped with 6 levels/stages of protection and water purification.
- WL 1000 UV equipped with 4 levels/stages of protection and water purification.

These water coolers are ideally suited for offices, banks, call centres, BPOs, canteens, showrooms, nursing homes, schools, hotels and even homes provided there is an online availability of water. It does not matter if the water source is from a municipal supply or comes from an overhead tank.

WL 1000 RO+UV

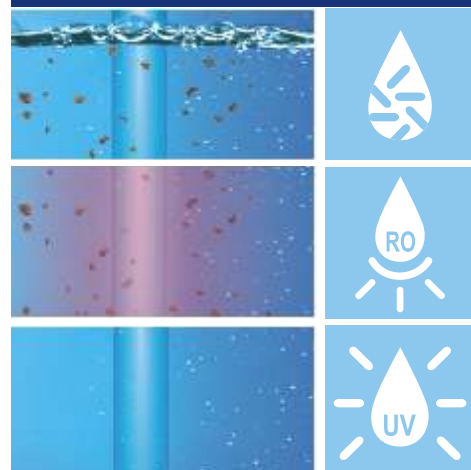

Reliable purification process* :

* For WL 1000 RO+UV model.

Feature 1 : Purity

MULTI-FILTRATION SYSTEM

- ▶ 5 micron sediment filter traps and removes sediment and solid particles
- ▶ Pre carbon filter reduces turbidity and particles as small as 1 micron
- ▶ TFC (Thin Film Composite) & PA (Polyamide) Membrane filter with high permeability removes lead, heavy metal ions, bacteria & virus, carcinogens, THMs (Trihalomethanes) and other organic compounds & contaminants
- ▶ Post carbon filter absorbs chlorine & odours and improves taste
- ▶ 8 Watts in-tank UV lamp destroys the growth of bacteria
- ▶ Biocote protection in the dispensing area inhibits the growth of micro organisms

	Model	
	WL 1000 RO+UV	WL 1000 UV
▶ 5 micron sediment filter traps and removes sediment and solid particles	Yes	Yes
▶ Pre carbon filter reduces turbidity and particles as small as 1 micron	Yes	Yes
▶ TFC (Thin Film Composite) & PA (Polyamide) Membrane filter with high permeability removes lead, heavy metal ions, bacteria & virus, carcinogens, THMs (Trihalomethanes) and other organic compounds & contaminants	Yes	No
▶ Post carbon filter absorbs chlorine & odours and improves taste	Yes	No
▶ 8 Watts in-tank UV lamp destroys the growth of bacteria	Yes	Yes
▶ Biocote protection in the dispensing area inhibits the growth of micro organisms	Yes	Yes

Feature 2 : BioCote® protection

This machine is protected by BioCote® - a unique anti-microbial solution that inhibits the growth of micro-organisms. The active ingredient in BioCote® is the element silver in the form of silver ions. Silver is a natural antimicrobial, which has been used for many centuries for its abilities to aid in preservation, especially in water systems.

You can see from the illustration on the right the potential benefits of a Biocote protected surface as compared to a non-Biocote protected surface. Bacteria usually reach a surface via hand cross contamination. The illustration shows that for the same level of bacteria and during the same period of time, the bacteria will proliferate very rapidly on a non-Biocote protected surface.

BioCote is however not a replacement for normal cleaning and sanitization. It is a second line of defense that provides constant protection.

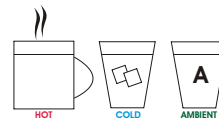

Feature 3 : Quality & Safety Guaranteed

"Our products demonstrate our commitment to energy efficiency, safety, ergonomoy and environmental best practices".

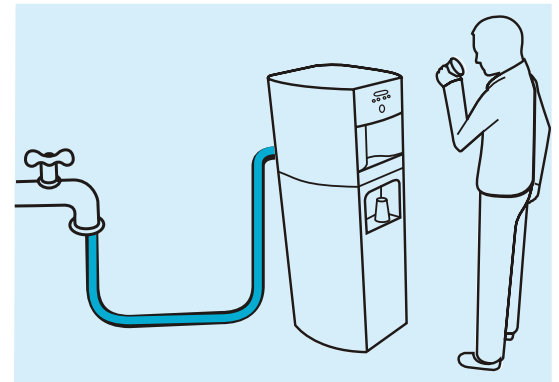

Feature 4 : Hot, Cold & Ambient Water options

Other Features:

- 11 ltr. Storage reservoir • 4 ltr. Cold water tank with UV
- 1.5 ltr. Hot water tank

Satisfied users of Waterlogic products across the world include names like HP, Daimler Chrysler, Deutsche Bank, Ernst & Young, Bayer, Bosch, Siemens, Reuters, Toyota, Sony, Price Waterhouse Coopers, Thyssen Krupp, Volkswagen, Dell, Microsoft, Louis Vuitton, British Airways, Renault, Credit Lyonnais, Mont Blanc, BMW and Peugeot amongst many others.

EASY MAINS CONNECTION

Technical Specifications

Model	WL 1000 UV/WL1000 RO + UV
Width/ Depth/ Height	15" x 14.6" x 44.9"
Cooling capacity at 12° C drop*	12 ltrs./ hour
Cold water temperature	3° ~ 12° C
Water flow	2 ltrs./ minute
UV lamp	8 W
Colour combination	Silver/ Charcoal Grey
Water connection	¼" hose
Recommended water pressure	40 to 60 PSI
Compressor	130 W
Refrigerant	R134a
Net weight	26.7 kg
Power supply	220V/ 50Hz/ 1 Ph

*Under standard test conditions.

Specifications, features and colours are subject to change without notice, due to continuous product development.

FAQs

1. Would a separate water purifier attached to the inlet of a storage water cooler not suffice?

Ans. Not, if purity is important to you. The water, after purification subsequently sits in the storage tank of the cooler for hours, often days, and is prone to breeding bacteria all over again. In the case of WL 1000 however, the UV lamp is specially fitted inside the cold water tank allowing constant purification, thereby guaranteeing purity.
2. Isn't it more cost effective to buy a Bottled Water Dispenser instead?

Ans. Not, if you consider the recurring cost of buying good quality water. For instance, if you are likely to consume two 20 ltr. jars daily, you would incur an expense of Rs.110 per day or Rs. 40,000/year on just buying water apart from the cost of the dispenser. Within that amount, you could buy the WL 1000 with RO + UV purification, and enjoy pure water free, for years.

Bottled Water Dispensers

The finest range of Bottled Water Dispensers in the Indian market! Experience, hygiene, style and convenience, all in one smart package. Ideal for *homes, offices and showrooms, or parties, functions and events.*

You get great tasting water, either *steaming hot* to make tea / coffee / instant soup in a jiffy, or super chilled to refresh you, with our without a soft drink / juice concentrate!

Technical Specifications

Model	TT	FS	FSR
Description	Hot & Cold	Hot & Cold	Hot & Cold
Cooling Method	Compressor	Compressor	Compressor
Cabinet Type	-	Storage Cabinet	Cool Cabinet
Cooling Capacity	2 L / Hr. 5-10°C	2 L / Hr. 5-10°C	2 L / Hr. 5-10°C
Cooling Tank Capacity	2.8 L	2.8 L	2.8 L
